## Allegato 14 Annex 14

Electronic prescriptions for life saving or recurrent medicines for foreign seafarers are accepted, except narrootio medici which require the presence of a doctor on board the vessel.  Australia  No problem, ring a doctor's surgery and book a phone discussion with a doctor for a prescription. The Shipping Agent co organise this and the Seafarer would only need to provide an electronic or paper copy of a prescription from a previous access relevant medication. There will be complications if the vessel has not served 14 day isolation.  Belgium  Need to have a prescription from a Doctor. Cannot issue electronic prescriptions for people not registered in their health but in every port pharmacists and doctors are collaborating to deliver necessary medicine on board for seafarers.  Brazil  There is no need for prescriptions to buy the medicine. If seafarers have a previous medicial prescription, at the seafarer's request through the Master, request the representative agent in the port, we provide and send medicine on board without problems.  Bulgaria  Depends on the internal rules for each pharmacy. Special medicines are under restriction but in general should not be a to access for a life threatening condition.  Canada  Seafarers' prescriptions that expire during the voyage will be renewed. Some prescriptions can be rolled over, others may an exam. Diabetes for example is one they want to be careful with. Prescriptions are prepared by the Mariners Clinic and delivered to ships. Video conferencing is available with seafarers to reduce visits to the doctors.  Chile  What have a mediciblocor's prescription. Some mediciations don't need a prescription in Chilis, such as medicine for high pressure, blood sugar, etc., which can be bought in any pharmacy. The local agent takes the patient to a doctor to prescription and provide and seafarer should ask the labour supply country to laise with the Chinese authorities to assist with the provision of me dark and provide and seafarers should ask the labour supply country to lais		Country
organise this and the Seafanr would only need to provide an electronic or paper copy of a prescription from a previous access relevant medication. There will be complications if the vessel has not served 14 day solation.  Need to have a prescription from a Doctor. Cannot issue electronic prescriptions for people not registered in their health but in every port pharmacists and doctors are collaborating to deliver necessary medicines on board for seafanres.  Brazil There is no need for prescriptions to buy the medicine. If seafarers have a previous medical prescription, it helps to rene even without a prescription, at the seafarer's request through the Master, request the representative agent in the port, which will not be a provided and send medicine on board without problems.  Bulgaria Depends on the internal rules for each pharmacy. Special medicines are under restriction but in general should not be a to access for a life threatening condition.  Canada Seafarer's prescriptions that expire during the voyage will be renewed. Some prescriptions can be rolled over, others may an exam. Diabetes for example is one they want to be careful with. Prescriptions are prepared by the Mariners Clinic and delivered to ships. Video conferencing is available with seafarers to reduce visite to the doctors.  Chile Must have a mediciotoc's prescription. Some medications don't need a prescription in Chile, such as medicine for high pressure, blood sugar, etc. which can be bought in any pharmacy. The local agent takes the patient to a doctor to prescription. The seafarer should ask the labour supply country to lisies with the Chinese authorities to assist with the provision of me Colombia.  If a crew member needs recurrent medicines it should not be a problem but it is a priority to receive electronic prescription renewals are covered under the current protocol/policy covering Medical Emergencies. Country	Notes
Kenya	Vessel agents are able to procure any medications required.
Korea	Electronic prescriptions cannot be issued as medicines are registered and controlled by a central government body. The crew member should visit hospital and get a prescription from a local doctor. For shore leave, crew should have mobile phone, install gps control - coronavirus application upon mandatory request by government quarantine office and check fever.
Liberia	"t. The Master must make declaration of all expired prescriptions to Port Health at the time of Boarding Party formalities.  2. Thereafter, the Master through the agent should make a request to Port Health on the prescription they intend to replenish.  3. Port Health reviews the replenishment list along with the declaration of expired prescription and approved the list.  4. The vessel agent through authorized ship Chandler procures the prescriptions on the replenishment or renewal list from only authorized pharmacy licensed by the Pharmacy Board of Liberia.  5. All procured prescriptions are taken back to Port Health to verify compliance with the renewal list and procured licensed pharmacy."
Mexico	Cross-check with company doctor and the local agent. The company doctor should contact a local practitioner to make a new prescription to be supplied before or on the day that the ship is in port.
Montenegro	No problem to provide medical assistance to foreign crew members on board ships. When medicine is required the ship's agent is obliged to announce it to the National coordinate body and to follow instructions given.
Morocco	No problem managing at the Moroccan ports with a certain flexibility of the port authorities and the support of the Morrocan union UMT.
Norway	The agent can arrange for a consultation with a Doctor rather than 'visit' a Doctor given the current restrictions.
Phillipines	Prescriptions of physicians not falling under the definition of Philippine law may not be recognized under the context of prescriptions, electronic or otherwise.
Poland	Any medical documentation from the country of origin is accepted proving the need. In such cases a Polish physician would issue a Polish e-prescription giving on the form a seafarer passport number instead of Polish PIN, which is accepted by a pharmacist. If the prescription is on a special cross-border form (it's not normally electronic) it is recognized in Poland and would be executed. If it's not, validation of a Polish physician would be required.
Portugal	Electronic prescriptions could be accepted. If not the seafarer needs to have documents from a doctor to by the necessary medication
Puerto Rico	A doctor cannot send electronic prescription and to know the pharmacy to send it to. There is a Walgreens and CVS near the Port of San Juan.
Romania	It is possible to get medicines with electronic prescriptions for foreign seafarers. All prescriptions are transmitted electronically to a nearest pharmacy or indicated pharmacy. All medicine is available except psychotropic drugs.
Russia	For foreign seafarers who arrive in ports a prescription will be needed only to identify the drug and the electronic prescriptions for life saving or recurrent medicines for foreign seafarers would be accepted at the pharmacy. But there are some categories of patients who are supposed to take the medicine for free. In this case, they need a prescription from their doctor. For example, insulin-dependent patients. As well as those patients who are treated for cancer, AIDS and some other most serious diseases.
Singapore	Prescriptions must be authorized or re-written by a Singaporean registered practitioner before being presented as hospitals and medical centres do not accept foreign prescriptions.
Sweden	Seafarer needs a paper prescription issued by a doctor from the EU. However it may be possible to arrange for them to see a Doctor.
Ukraine	Most medications in Ukrainian pharmacies are sold to anybody without any prescription. The crew are unlikely to face any problems if the list of medications is submitted to company/local agent in advance to purchase the required medications.
United Kingdom	MCA reported that seafarers were having online consultations with doctors and any prescriptions were being issued that way. No details were given about the logistical issue of getting the requisite medications to the seafarer, but presumably the necessary information is communicated to a pharmacy local to the port where the seafarer's ship is, or is heading to. The supplies are taken by courier to the ship, if the seafarer is not able to leave the ship and collect them.
United States of America	Seafarer would have to see a doctor somewhere within the U.S. who could accept a foreign prescription and then issue a U.S. prescription that would be good anywhere within the U.S.
United States of America (Florida)	All crew have to do is let the medical staff on board know what meds they need and they will get it, either from ship's medical stores or if they don't have it on board they will get in touch with shore side medical staff, who will get the prescription filled.
United States of America (Gulf Coast)	As long as the seafarer has their prescription or the bottle in which the meds came, it is in most cases not a problem to get a refill
United States of America (Portland)	Teleconferencing with patients on board and crews can go to a pharmacy for medication renewal. This is usually arranged by the vessel agent.
United States of America (Texas)	If the seafarer's family can send the medicine by postal service on time (depending on the country) to the agent or nearest seafarer's center or to an inspector, they can bring it to the ship. If agent and owner agreed to send the patient to the doctor, the patient will get the prescription from the doctor for medicines required.
